

ENVIRONMENTAL POLICY

Northumbrian Roads Ltd is in the business of road surfacing, maintenance, recycling of aggregates and construction waste and the manufacture of asphalt products. The Company is made up of individuals, all of whom want a clean working environment and sustainable for their families. We are not complacent about our present environmental performance. We are always looking for improved ways of working to reduce the impact we have on the environment. We are committed to continual improvement, the protection of the environment, including prevention of pollution and others specific to the context of the company, compliance with environmental legislation as a minimum requirement, and we follow other codes of practice. We have achieved acceptance to the International Environmental Management System Standard ISO14001: 2015 to include National Highway Sector Scheme No. 16 for the Laying of Asphalt Mixes. We hold an annual review of our performance at which we set objectives and targets to improve our performance over the next 12 months.

Our Targets are:

- find ways to reduce the amount of waste we produce
- try to turn our waste e.g. road planings and waste oil into useful products
- ensure that harmful substances are not discharged to air, land or water
- reduce unnecessary consumption of materials, energy and water
- monitor our energy consumption and set targets to reduce it
- promote awareness of energy use among employees

We intend to set annual targets which will help us to carry out this policy and meet each of our objectives and demonstrate that we are continually striving to improve our performance. This Policy is communicated to all staff and those working on behalf of Northumbrian Roads Ltd.

Sean Lynch
Managing Director
